

Iggy & The Cradle

Iggy is a versatile mini action tripod. Built from rugged ABS plastic, Iggy has an adjustable ballhead with a 1/4"-20 screw mount.

Measuring just 14 cm / 5.5 " high when standing, Iggy lends itself to a huge variety of uses including desktop tripod, stand mount for lights or microphones, and paired with The Cradle, can be used with a phone to watch video or take photos. Iggy's legs can also be closed to form an ergonomic handle ideal for handheld use with action cams and smartphones.

Featuring two 1/4"-20 screw threads for attachment to tripods, The Cradle is an expandable phone holder which can hold most smartphones up to iPhone 6/7/8 Plus and Samsung Galaxy S8. The Cradle folds flat for storage and transportation.
