

# QR11

## Universal L-Brackets

3LT's QR11 is designed to fit most cameras, and gives tripod users a seamless, effortless transition between portrait and landscape whilst maintaining the sensor in a similar position and on the same focal plane. The QR11 has strap connectors on both vertical and horizontal aspects which makes it compatible with sling straps; it has an additional 1/4"-20 thread for the attachment of accessories; and can be stored flat for travel.
